MAKING ONLINE TRAINING AFFORDABLE FOR EVERYONE!

If you think occupational dog bite safety is expensive, think about the financial consequences of not offering training. We want every employee to be safe, so we have designed a program to help you make this important training available to all your employees in a cost effective manner. Your company can afford to protect your employees! Our video training program can benefit both seasoned employees and new hires.

Used alone or in conjunction with on-site training, this is the most economical way to protect your employees. This can easily be viewed over and over, for as many employees as you want. If you elect to have one employee go through our "train the trainer" program, the video training course will help become an important tool for your internal trainer to reinforce this information they train your other employees.

Our video training program consists of ten 5-6 minute modules with a bank of questions and interactive scenarios to help reinforce the training concepts.

Certificate of completion is available after course is completed and employee passes the course for your records.

Knowledge and awareness give your employees the power to avoid or safely handle their interaction with dogs in their daily activities. Reduce your incidences of dog bite encounters by giving your employees the tools and knowledge they need when they need it. You will never need to worry about the scheduling complications of bringing your employees to a specific location at specific times.
