

OCCUPATIONAL DOG BITE PREVENTION TRAIN THE TRAINER (TTT)

ODBS TTT Training Helps **Reduce** Your Employees Injury and Saves Lives!
Become a Subject Matter Expert/Certified Trainer on Occupational Dog Bite Safety Today.

Bulli Ray offers Dog Bite Prevention Train the Trainer courses at your company's location.
This 2-day course accommodates 8 to 20 participants.

CERTIFIED TRAIN THE TRAINER CONFERENCES (3 Days)

Certified Train the Trainer conferences are held yearly - these are two days of intensive training sessions intended to provide Bulli Ray Occupational Dog Bite Safety (ODBS) certification. This certification can be used by in-house safety leaders that need to conduct training within their company or organization. Attendees will leave with the tools to create a customized ODBS training and curriculum specifically designed for your company.

Attendees will be trained using the tools and materials to successfully evaluate and assess risk of attack, defend against single dog and pack attacks, identify breeds that pose a threat, and effectively identify and report dangerous dog attack and potential attack situations. Train the trainer conferences may be scheduled at a company's onsite training location if six or more attendees sign up for a TTT conference.

Dog bite safety, like any other worthwhile educational endeavor is a process of disseminating information and knowledge on a regular basis. Follow through and repetition are especially important when human life and safety are at stake.

TRAIN THE TRAINER COURSE

Certified Train the Trainer conferences are held yearly - these are two days of intensive training sessions intended to provide Bulli Ray Occupational Dog Bite Safety (ODBS) certification. This certification can be used by in-house safety leaders that need to conduct training within their company or organization. Attendees will leave with the tools to create a customized ODBS training and curriculum specifically designed for your company.

- Our intensive training for in-house safety leaders that allows the participant to be come a Subject Matter Expert/Certified Trainer
- Training curriculum & training models
- ODBS policies & procedures
- Occupational Dog Bite Safety Facilitator's Guide

Who Should Attend Train the Trainer:

Safety Managers/Directors
Animal Control Officers
Contractors
Construction Managers
Meter Reader Supervisors
Postal Managers/Supervisors
Plant Managers
Loss Control/Risk Managers
Field Service Managers
Safety Engineers
Personnel & HR Managers
Police Officers

One time training is not enough, certification for trainers lasts two years. After that time, your trainer will need to attend a re-certification class to stay current on the newest techniques in dog bite safety.
